2012

During the twenty years since the restoration of independence, Lithuanian scientific journals made an enormous step forward towards greater quantity and improved quality. In this respect, the current decade was especially significant as the best scientific journals of Lithuania became recognised by the global scientific community.

Challenges of journal publishing are well known to editors of scientific journals and their assistants. Not to mention the search for financial resources, which became especially difficult with economic downturn, – a proper attention must be given for other issues. First of all, to ensure a sufficient portfolio of articles, a journal must be recognised by Lithuanian and foreign researchers of the relevant scientific field. The primary selection of submitted articles aims to eliminate cases of graphomania and plagiarism. As demonstrated by this catalogue, many editorial boards of Lithuanian scientific journals use the *CrossCheck* screening tool to make sure no analogous or similar article was published somewhere else in the world, which might be unnoticed by editors or reviewers. Although very helpful, screening with *CrossCheck* takes editors and reviewers only part of the way. It is obvious that Lithuania is too small to guarantee an impartial review in a narrow scientific field. Consequently, articles in languages other than Lithuanian need to be accepted and printed, which necessitates services of a high-level usually English language editor. Without a doubt, all journal editors are familiar with difficulties related to timely performance of reviewers. Such challenges could be easier overcome with the help of a representative and international editorial board of the journal. Still, even once reviews are received, some time should be allotted to article authors to consider reviewer comments. Only then technical staff can proceed with layout design and descriptions for databases.

Editors and publishers of numerous journals realised that various issues can be easier and more effectively resolved through the Association of Lithuanian Serials. The Association not only disseminates information regarding Lithuanian scientific journals on the global scale but also assists publishers in resolving practical issues as well as organises qualification improvement seminars and conferences, to which celebrities of the publishing world and representatives of databases are invited. Also, it circulates information regarding globally available platforms for publishing as well as collection and processing of statistical data. Together with other stakeholders, the Association pursues active participation in drafting, discussing and approval of the Code of Ethics for Lithuanian publishers and authors of scientific journals.

This Catalogue of Lithuanian Scientific Journals is published in Lithuanian and English. It presents 14 journals from the field of Humanitarian Sciences, 34 — Social Sciences, 13 — Physical Sciences, 2 — Biomedicine, 12 — Technologies, as well as 4 interdisciplinary scientific journals. The total of 79 Lithuanian scientific journals is listed in this publication. The Catalogue will be distributed at international publishing exhibitions and international conferences organised in Lithuania and abroad.

Viršuliškių g. 25-12, LT-05106 Vilnius, Lithuania  
[www.moksloperiodika.lt](http://www.moksloperiodika.lt)

All journals introduced in the Catalogue of Lithuanian Scientific Journals are peer-reviewed. Information on journals was provided by their editorial boards. The Abstracts&Indexing section alone was supplemented with information from the Ulrich's (Ulrich's International Periodicals Directory) database.

*Note.* The CrossCheck marking means that an editorial board of a journal employs the plagiarism prevention service offered by CrossRef.

## Acknowledgements

The Council of the Association of Lithuanian Serials would like to express its gratitude to editorial boards of all journals that partook in this initiative for the especially smooth collaboration.

**Publisher**  
Siauliai University

### Journal Scope

The aim of the publication is to stimulate research in the modern branches of linguistics and to disseminate the materials of the Lithuanian language in the sphere of international research. Papers corresponding to the two fields of research of the Faculty of Humanities – ethnolinguistics and poetics – are published in the journal.

The Editorial Board of "Philologija" is first of all interested in the following issues: concept expression, conceptual metaphors, lexical nomination, text pragmatics, and semantics of the text of fiction. Priority is given to the articles written on the basis of modern methodologies, first of all, those using the methods of Cognitive Linguistics. Some papers can be dealing with general theoretical issues, while others may reflect the outcomes of the concrete philological research.

<http://www.vpu.lt/zmogusirzodis>

### Publisher

Lithuanian University of Educational Sciences

### Journal Scope

A journal "Man and the Word" consists of 4 parts: No.1 "Didactic Linguistics", No. 2 "Science of Literature", No. 3 "Foreign Languages", No. 4 "Philosophy". It is published by Vilnius Pedagogical University. The journal endeavours to publish significant research articles in the humanities and social sciences on philology, philosophy and educology. All four parts of the journal are published each year since 1999.

The articles, published in edition or research works "Didactic linguistics" deal with such problems: the Lithuanian language, its history, dialects, contacts of languages, connection between the language and culture and other linguistic problems. Many of the articles analyze actual problems needed for studying in higher school. Didactic articles form a separate chapter.

Issue No.2 of the magazine "Man and Word" is called "Literary Criticism". It covers a wide range of scientific interests. Most of the articles there are devoted to literature analysis. Other articles discuss problems on culture, literature links with teaching process, and the reviews on Modern literature.

Number 3, which is called 'Foreign Languages', consists of articles dealing with the questions on modern aspects of different languages: traditional and functional grammar, language typology, semantics, pragmatics, text linguistics, translation and languages history.

Number 4 has dedicated to philosophy. Here are published articles, translations, appreciations and reviews. The most part of the articles are connected with phenomenology and hermeneutic views. Also are published articles about history's philosophy investigations. Special attention has assigned to the analyze of pedagogical philosophy and education science.

### Publisher

Lithuanian university of Educational Sciences

### Journal Scope

The *significance* of the publication is conditioned by the *continuity of fundamental ideas of education science and practice*, which creates conditions for their comprehensive integration based on the latest researches of scientists and practitioners as well as on scientific searches of Master and Doctoral students. The *variety of themes*, which embraces all the spheres of pedagogy, andragogy and education management, also contributes to its significance. It should be pointed out that papers by foreign contributors are also published, which expands the space of the pedagogical thought by new experiences and insights. The *exceptionality* of this publication is reflected through an expeditious response to the key aspects relevant for educational practice, which include all the spheres of education, and especially through development of didactic aspects, which naturally embody interdisciplinary potential, as well as through linking of teacher training and school practice.

### Publisher

Siauliai University

### Partners

Siauliai University, Open International University of Human Development „Ukraine“

### Journal Scope

It is not the first year that Šiauliai University from Lithuania and Open International University of Human Development "Ukraine" from the Ukraine collaborate promoting social participation of persons with disability. Both universities with their real institutional example strive for the creation of all conditions for persons with disability to study in the universities thus making real preconditions for further societal integration. It is this common aim that is the essential value uniting both universities. Pointing out another common value with the statement by Elster "History is the result of human activity not of ideas" we would like to explain not only the circumstances under which the journal appeared but also ensure that we would strive for the unity of science and practice, so that the research presented in the journal has distinct methodological direction – orientation towards the creation of social welfare in the society. Being for the unity of science and practice we firstly speak up for the investment in people and knowledge (concept by Schultz). It is the third value uniting us. This value basis: striving for social justice – active performance – investments in people and knowledge – not only describes mission and aims of the journal but also guarantees internationality, interdisciplinarity and originality of scientific works. Only by acting together we could expect the changes in the society.

### Publisher

Lithuanian Sports Science Council, Lithuanian Olympic Academy, Lithuanian Academy of Physical Education, Lithuanian University of Educational Sciences

### Journal Scope

The journal publishes the latest and original Lithuanian and foreign researches results in social, biomedical, physical, humanitarian science fields; introduces to the newest articles from the leading Lithuanian and foreign laboratories; represents the latest information from sport science congresses, international conferences; the latest doctoral dissertations are introduced, as well. Editorials form and suggest resolutions to various sport science problems in Lithuania, follow foreign experience. This journal embraces all areas of sport science, helps in developing Lithuanian sport science strategy.

### Partners

Johannes Kepler University Linz (Austria), Higher School of Management and Technology at Polytechnic Institute of Santarém (Portugal), Faculty of Organization and Informatics at University of Zagreb (Croatia).

### Journal Scope

The major aims of periodic reviewed research papers journal Social Technologies are:

- To reveal possibilities of development of application of social technologies in social spheres, content, extent, tendencies, to prepare decisions of strategic importance, and to foresee tasks and recommendations as to how social technologies can transform various spheres of social life.
- To develop interdisciplinary researches in mathematics, informatics, electronics, new technologies, management, psychology, public administration, economics and other fields.
- Encourage scientific researches seeking for new theoretical and practical solutions to designing social technologies and adapting them to sustainable development of society.
- Promotion of scientific knowledge.
- Main topics of the journal:
  - Social technologies in business organization management,
  - Social technologies in public management,
  - Social technologies' legal environment,
  - Social process modeling and perspectives for development of society,
  - Social technologies in the processes of teaching and learning.

The Association of Lithuanian Serials

### Journal Scope

This journal reveals the models and conceptually discussed aspects of legislation and judicial jurisprudence. With its scientific ideas it also adds up to the improvement of the laws of the Republic of Lithuania and the development of the doctrine of the Constitutional Court and administrative courts of the Republic of Lithuania which are related to the interpretation (evaluation) of laws. Moreover, the journal aims at publishing the material from academic conferences on constitutional and administrative law as well as legislation of law-makers and case-law stimulating research.

International Federation for Information Processing (IFIP)

### Journal Scope

"Olympiads in Informatics" is a refereed scholarly journal that provides an international forum for presenting research and developments in the specific scope of teaching and learning informatics through olympiads and other competitions. The journal is focused on the research and practice of professionals who are working in the field of teaching and learning informatics to talented student. "Olympiads in Informatics" is published annually (in summer). Only original high-quality scientific papers are accepted. All submitted papers are peer reviewed.

The journal is closely connected to the scientific conference annually organized during the International Olympiad in Informatics (IOI). Authors are requested to present their papers during the IOI conference.

### Journal Scope

"Informatics in Education" is a peer-reviewed journal that provides an international forum for presenting the latest original research results and developments in the fields of informatics and education. It is a satellite journal of the international journal "Informatica" (<http://www.mii.lt/informatica/>) with a specific focus on education. The journal will promote making contacts among researchers in informatics and practical educators both in the Baltic countries and that in Eastern and Central Europe where a distinctive methodology of teaching and learning informatics has been developed and is of great interest. "Informatics in Education" is published biannually (in April and October)

### Journal Scope

The scope of the journal is to provide a multidisciplinary forum for scientists, researchers and engineers involved in research and design of nonlinear processes and phenomena, including the nonlinear modelling of phenomena of the nature. The journal accepts contributions on nonlinear phenomena and processes in any field of science and technology.

The aims of the journal are:

- to provide a presentation of theoretical results and applications;
- to cover research results of multidisciplinary interest;
- to provide fast publishing of quality papers by extensive work of editors and referees;
- to provide an early access to the information by presenting the complete papers on Internet.

### Partner

Lithuanian Academy of Sciences

### Journal Scope

"Informatica" publishes papers on mathematical simulation and optimization, recognition and control, automation systems and elements, software engineering, multimedia technologies, data mining, and provides a multidisciplinary forum for scientists and engineers involved in research and design including experts who implement and manage applications.

The aims are: to provide a balanced representation of theory and applications, to cover the research results of both the East and the West equally, to provide fast publication of quality papers by the efficient work of referees, to provide an early access to the information by presenting the PDF files of the complete papers on the Internet.

All these aims taken together explain the unique quality of this journal and how it is distinguished from other journals in the rapidly expanding field.

Lithuanian Statistical Association

### Partner

Statistics Lithuania

### Journal Scope

The aims of the journal are:

- to promote and extend statistical education and application of statistical methods in all kinds of theoretical and applied sciences,
- to provide a forum for statisticians of Lithuania and other countries working in various fields of research to exchange their ideas and achievements, extending in this way possibilities of statistical applications.

The journal presents papers on

- the fundamental research in statistics, on inputs of statisticians into the theory of statistics and methodology of its applications,
- the application of statistics in economy, physical, technological, bio-medical and social sciences through the case studies,
- the application of statistical methods in official statistics, enriching them with the experience of other countries,
- the investigation of the history of statistics, information on important statistical events papers, relevant to the occasion important to the statistical science.

All papers are reviewed by the anonymous referees.

## The Baltic Journal of Road and Bridge Engineering

### Editor-in-Chief

Prof. Dr Donatas Čygas

Print ISSN	1822-427X
Online ISSN	1822-4288
Volume	7
Frequency	Quarterly
Language	EN

<http://www.bjrbe.vgtu.lt>

### Publisher

Vilnius Gediminas Technical University

### Partners

Riga Technical University; Tallin University of Technology; Baltic Road Association

### Journal Scope

The Journal is designed for publishing papers concerning the following areas of research: road and bridge research and design; road construction materials and technologies; bridge construction materials and technologies; road and bridge repair, road and bridge maintenance; traffic safety; road and bridge information technologies; environmental issues; road climatology; low-volume roads; normative documentation; quality management and assurance; road infrastructure and its assessment; asset management; road and bridge construction financing; specialist pre-service and in-service training.

Besides, it publishes: advertising materials; reviews and bibliography; abstracts of PhD thesis; reports about conferences and workshops.

### Partners

Lithuanian Academy of Sciences, International Academy of Ecological and Life Protection Sciences which is an associate member of the Public Information Department of United Nations

### Journal Scope

The Journal is an international medium for the publication of original research on the environment with emphasis on changes caused by human activities. The scope is multidisciplinary and international and the subjects covered include atmosphere and air pollution control and pollution mitigation technologies, water pollution control and pollution mitigation technologies, soil pollution control and pollution mitigation technologies, entrails of the earth, their protection, waste management, zero-waste technologies, environmental expertise, control over physical and technological environmental impacts and reduction technologies, nuclear hydro physics and radioactive pollution, modelling environmental processes, environmental monitoring, landscape protection, environmental ethics, environmental law and management, quality of indoor and outdoor environment. Besides, it publishes short reports and observations, reviews and bibliography, reports on conferences and workshops.

### Publisher

Kaunas University of Technology

### Partners

Vytautas Magnus University; Aleksandras Stulginskis University; Klaipėda University; Vilnius University; Šiauliai University; Lithuanian Energy Institute; Engineering Ecology Association

### Journal Scope

The journal "Environmental Research, Engineering and Management" is designed to serve as a roadmap for understanding the issues and debates in the overlapping fields of environment and development. Tremendous strides have been made in elevating the issues of the environment and sustainable development in public and governmental consciousness, in research and developing institutions for addressing these issues, and in implementing practices and policy options.

The Journal provides advanced original papers on specific environmental and sustainability issues, such as: air and water pollution, impact to environmental and human health assessment, sustainable production, and consumption, life cycle management.

### Abstracting & Indexing

CABI: Abstracts on Hygiene and Communicable Diseases, Agricultural Engineering Abstracts, Animal Science Database, Biofuels Abstracts, CAB Abstracts, Crop Physiology Abstracts, Crop Science Database, Dairy Science Abstracts, Environmental Impact, Field Crop Abstracts, Forest Products Abstracts, Forest Science Database, Forestry Abstracts, Global Health, Grasslands and Forage Abstracts, Horticultural Science Database, Irrigation and Drainage Abstracts, Leisure, Recreation and Tourism Abstracts, Leisure Tourism Database, Nutrition Abstracts and Reviews Series A: Human and Experimental, Nutrition and Food Sciences Database, Organic Research Database, Ornamental Horticulture, Postharvest News and Information, Review of Aromatic and Medicinal Plants, Seed Abstracts, Soil Science Database, Soils and Fertilizers, Sugar Industry Abstracts, TropAg & Rural, Veterinary Science Database, Weed Abstracts, Wheat, Barley and Triticale Abstracts, World Agricultural Economics and Rural Sociology Abstracts; CSA (Cambridge Scientific Abstracts): Aqualine, Aqualine Abstracts, CSA Sustainability Science Abstracts, Environmental Sciences and Pollution Management, Pollution Abstracts; INSPEC; VINITI RAN; EBSCOhost: Current Abstracts, Environment Complete, Environment Index, GreenFILE, TOC Premier; Ulrich's; DOAJ (Directory of Open Access Journals); Excellence in Research for Australia (ERA) 2012 Journal List (ERA ID 5874)

## Geodesy and Cartography / Geodezija ir kartografija

### Editor-in-Chief

### Publisher

Lithuanian Academy of Sciences

### Partner

Lithuanian Energy Institute

### Journal Scope

Is publishes important scientific, practical application, review and problems papers in this fields:

- economics of energetics;
- modelling and management of energy systems;
- nuclear energetics and safety;
- radioactive waste disposal;
- metrology in energetics;
- renewable power sources;
- thermal physics, combustion processes;
- material studies and technology;
- hydroenergetics;
- plasma technologies.

### Publisher

Versmė Publishers

### Journal Scope

*The aim of the edition* is to show the interdisciplinary fundamental and applied researches carried out in Lithuania on the phenomenon of comprehensive locality, mainly papers from the areas of humanities and social sciences as well as publish some literary sources. The present electronic serial contains collected scientific papers published in the monograph series "Lietuvos Valsčiai" (ISSN 1822-489X).

*The research areas:*

- Humanities (History and Theory of Arts 03H, Philology 04H, History 05H, Ethnology 07H),
- Social Sciences (Sociology 05S),
- Physical Sciences (Geology 05P, Geograph 06P),
- Biomedical Sciences (Biology 01B).
