Mission

Crossref makes research outputs easy to find, cite, link, assess, and reuse.

We're a not-for-profit membership organization that exists to make scholarly communications better.

Overview

- Over 12,000 member organizations
- 16 member board, cross section of international publishers
- Metadata store of over 121 million scholarly content items
- A Digital Object Identifier (DOI) is just the start - We offer a wide array of services to ensure that scholarly research metadata is registered, linked, and distributed.
- We preserve the metadata we receive and make it available via our open APIs and Search
 - 630 million queries per month across different interfaces

In Lithuania

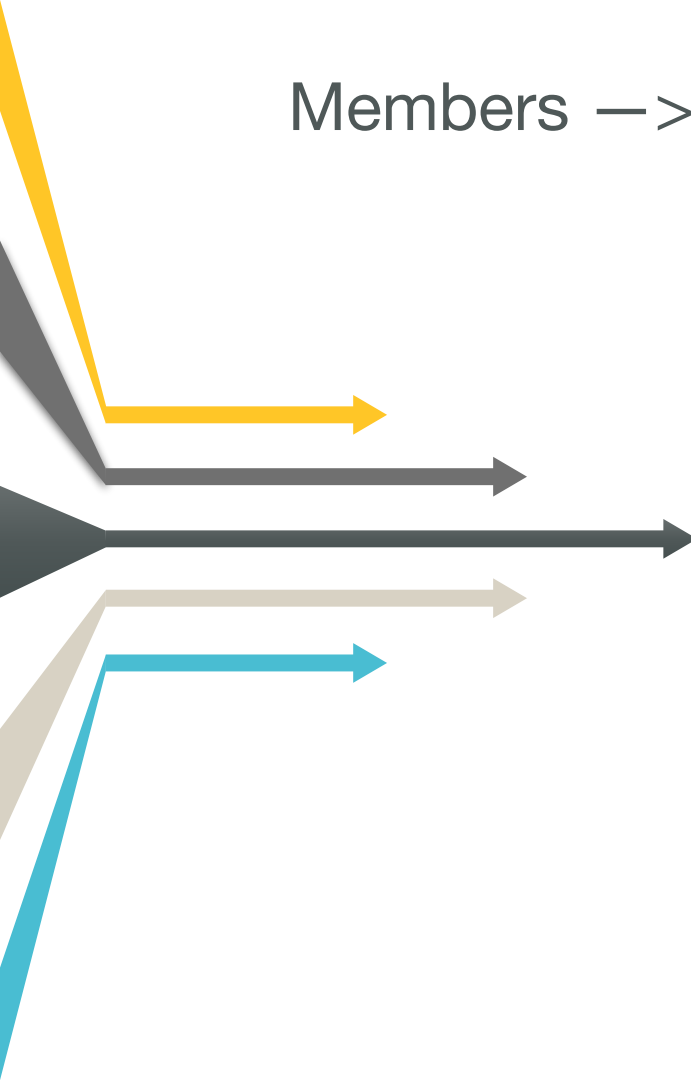

31 participating organizations in Lithuania: mostly via universities, societies, individual journals

First member from Lithuania joined in 2008, latest in 2021

Over 60,000 content items registered

Members —> Crossref

Basic metadata: titles; author names; ISSNs/ISBNs, abstracts, references

Funding Information, Funder identifiers, award numbers

License Information, License URIs

Full-text URIs (e.g. for text mining and Similarity Check)

Crossmark: updates, retractions, corrections

ORCID iDs

Recently: Peer Review reports, relations, Grant IDs

Aggregate and integrate content & verify records are valid and accurate

“Help Unpaywall identify and disambiguate over 20 million Open Access articles, and it is absolutely essential to our work. We 🥰❤️🤔 Crossref!” – Jason Priem, ImpactStory

Collect related research objects

“We check for the availability of articles associated with our data packages, and to verify some of our metadata. Being able to do this programmatically has revolutionized our data publication workflow.” – Elizabeth Hull, Dryad

Data from: Fifty thousand years of arctic vegetation and megafaunal diet

Eske Willerslev, John Davison, Mari Moora, Martin Zobel, Eric Coissac, Mary E. Edwards, Eline D. Lorenzen, Mette Vestergård, Galina Gussarova, James Haile, Joseph Craine, Gaddy Bergmann, Ludovic Gielly, Sanne Boessenkool, Laura S. Epp, Peter B. Pearman, Rachid Cheddadi, David Murray, Karri Anne Bråthen & Nigel Yoccoz

Version 1 of Dataset published 2014 in [DRYAD](#)

Although it is generally agreed that the arctic flora is among the youngest and least diverse on Earth, the processes that shaped it are poorly understood. Here we present 50 thousand years (kyr) of arctic vegetation history, derived from the first large-scale ancient DNA metabarcoding study of circumpolar plant diversity. For this interval we additionally explore nematode diversity as a proxy for modelling vegetation cover and soil quality, and diets of herbivorous megafaunal mammals, many of which became extinct around 10 kyr BP (before present). For much of the period investigated, arctic vegetation consisted of dry steppe tundra dominated by forbs (non-graminoid herbaceous vascular plants). During the Last Glacial Maximum (25–15 kyr BP), diversity declined markedly, although forbs remained dominant. Much changed after 10 kyr BP, with the appearance of moist tundra dominated by woody plants and graminoids. Our analyses indicate that both graminoids and forbs would have featured in megafaunal diets. As such our findings question the predominance of a late Quaternary graminoid-dominated arctic “mammoth steppe”.

...but maybe this?

Better metadata makes content useful!

Sounds great, how can I send it to you?

Upload XML file (<https://doi.crossref.org>)

The manual web deposit form (<https://apps.crossref.org/webdeposit>)

OJS Crossref plugin (<https://docs.pkp.sfu.ca/crossref-ojs-manual/en/>)

Metadata Manager

(<https://www.crossref.org/education/member-setup/metadata-manager/>)

OJS collaboration

- Metadata export v 2.4.5 and higher
- DOI deposit/content registration
- Expanded article metadata - abstracts, ORCID, Full-text URLs
- References for v. 3.1 and later
- Further improvements coming in 2021

Mistakes happen: how can I fix it?

No charge to update metadata

Don't register a new item/DOI as a 'fix' - update your existing metadata or alias it if you're really stuck!

We don't delete DOIs :)

<https://www.crossref.org/education/metadata-stewardship/maintaining-your-metadata/updating-your-metadata/#00168>

Correcting your metadata if you have already deposited it

Redeposit via OJS

Redeposit via the Web Deposit Form

Edit the metadata record in Metadata Manager

Update and redeposit your XML file at doi.crossref.org
